**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-10 are objected to because of the following informalities:

In independent claim 1, the first step --- determining ---- cannot be readily mapped to the terminology in the remainder of the specification. Appropriate correction is required.

The limitations of claim 8 and 9 cannot be readily mapped to the remainder of the specification.

The remaining dependent claims fall with their parent claim.

No art is developed against claims 8 and 9.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11,17,1-4 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Lai.

With respect to apparatus claims 11, 17, applicant's attention is drawn to the discussion/description of figure 1 in the Lai document. All claimed elements are met.

With respect to method claims 1,2 and 10, these functional steps are met when the above system operates.

In as so far as claims 3 and 4 refer to method steps, they are considered inherently present in the above reference. Alternatively, the acknowledge prior art discusses them (acknowledged in the present application as figure 1.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2627

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
3. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 1 above, and further in view of Kim.

With respect to the limitations presented herein, as noted by Kim, additional lpf if relied upon in this environment in order to yield a better EFM so as to compensate for asymmetry of the optical disc.

It would have been obvious to modify the base system as relied upon above in paragraph 2 with the above teaching from Kim, motivation is as taught by Kim to compensate for asymmetry in detection of the reflected signal from an optical disc.

#### ***Conclusion***

4. Claims 12-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the cited prior art teaches or discloses the limitations as presented in claim 12 in this environment.

The remaining prior art is cited as of interest with respect to alternative te signal processing known in this environment.
